

FORENSIC PHOTOGRAPHY

NAME: SEGOBIA, CIELA S.
YEAR AND SECTION: BSCRIM 2B

DATE: FEB. 10, 2026
RATING:

ACTIVITY 1:

• Choose your subject for photography eg. (human, animals plants object, etc.) take a photograph of it under different light categories (Bright light, hazy light, dull light and artificial light) on A4 size bond paper print the image and write your observations below of each images.

1. BRIGHT LIGHT

- Bright light is a lighting condition where subject produce strong shadows because the source of light is not covered with clouds. This photo shows bright light. The clear sky and sharp shadows on the grass show strong, direct sunlight.

2. HAZY LIGHT

- Hazy light means soft and diffused light, often due to fog, clouds, or particles in the air. The lighting in the photo is hazy light it implies the lack of light or visibility that's why it look a bit blurry or less sharp.

3. DULL LIGHT

- Dull light means low intensity or weak light, often making things appear less vibrant or shadowy. The lighting in the photo is dull with a moody, low-contrast atmosphere that makes the scene feel shadowy and muted.

4. ARTIFICIAL LIGHT

- Artificial light refers to light from man-made sources like lamps, flash, or LED's. Example of it is the photo below, I took this photo at night using my cellphone flash giving the image a soft, yellowish glow with sharp shadows.
