Mindanao State University Main Campus

Vision

MSU System aspires to be a Center of Excellence in Instruction, Research and Extension transforming itself into a premier and globally competitive national peace university.

Mission

MSU System is committed to:

1. Lead in social transformation through peace education and integration of the Muslims and other cultural minority groups into the mainstream society;
2. Ensure excellence in instruction, research development, innovation, extension, and environmental education and discovery;
3. Advance national and international linkages through collaboration and,
4. Demonstrate greater excellence, relevance, and inclusiveness for Mindanao and the Filipino nation.

Goals

The MSU-Main Campus is committed to:

1. Promote and strengthen academic excellence in all levels of education to produce graduates who are competent to meet future needs of humankind;
2. Enhance the visibility of the university through production of high-impact researches and innovation;
3. Respond to globalization trends through partnerships and collaborative relationships with national and international universities, research institutions, and industries;
4. Secure and preserve the University resources and facilities;
5. Integrate peace education programs in the University curricula;
6. Strengthen and sustain extension services;
7. Transform the University through investments in human resource development, infrastructures, and equipment.

Objectives

1. Promote and strengthen academic excellence in all levels of education:
2. Enhance the visibility of University through production of high-impact researches and innovations:
3. Respond to globalization trends through partnerships and collaborative relationships with national and international universities, research institutions, and industries:
4. Secure and preserve the University resources and facilities:
5. Integrate peace education in the various programs of the University:
6. Strengthen and sustain extension services:
7. Transform the University through investments in human resource development, infrastructures, and equipment:

College of Natural Sciences and Mathematics (CNSM)

Vision

The College of Natural Sciences and Mathematics envisions to be the leading institution in the MINSUPALA region on instruction, extension and research and development in natural sciences and mathematics.

Mission

The College of Natural Sciences and Mathematics believes that as a unit in the University, its missions are the following:

1. To offer the relevant and responsive programs in natural sciences and mathematics in line with the goals of national development.
2. To develop and strengthen a culture and philosophy of science and mathematics.
3. To establish linkages with local and foreign institutions for resource generation.
4. To take an active role in promoting environmental management and conservation.
5. To engage in basic and applied research in mathematics, science and technology.
6. To produce highly competent, nationalistic and morally upright graduate

Goals

The College of Natural Sciences and Mathematics is committed to do the following:

1. To provide students with adequate background in natural sciences and mathematics.
2. To provide students with a strong foundation in their field of discipline relevant to their pursuit of higher education.
3. To train students for service, particularly in the area of specialization in sciences and ultimately contribute to the development of the entire nation.
3. To promote scientific research.
5. To upgrade the faculty member's capabilities in instruction and research.

Biology Department

Vision

The Biology Department envisions to be the leading department in the MINSUPALA Region on instruction, extension and research and development in biological sciences.

Mission

Being a structural unit of the university, the Biology Department has the following missions:

1. To offer the relevant and responsive programs on biological sciences in line with the goals of national development.
2. To develop and strengthen a culture and philosophy of biological sciences.
3. To establish linkages with local and foreign institutions for resource generation.
4. To take an active role in promoting environmental management and conservation.
5. To engage in basic and applied research in biology and technology.
6. To produce highly competent, nationalistic and morally upright graduates.

Objectives

1. To produce graduates who can upgrade, strengthen, and expand instructional and research programs in the biological sciences in the MINSUPALA Region.
2. To produce graduates who can lead and promote the management and conservation

of the environment particularly the biological resources of the MINSUPALA Region.

3. To produce biologists who can take an active role in local, regional and national projects for social and economic upliftment of communities comprising the MINSUPALA Region.
4. To produce graduates who are academically-prepared for graduate studies in biology and related fields or for professional studies in the medicine field.
5. To produce graduates who can exercise critical and scientific thinking skills in relation to biological issues of human concern such as cloning, the human genome project, construction of transgenic individuals, family planning, euthanasia, and global warming.
6. To produce graduates who will holistically promote human life and social relationships of the highest quality based on mutual understanding, respect and concern for the common good.
